## CLIMATE AND WEATHER

The average high and low temperature chart below serves as a useful measure of climate. Weather Risk suggests the risk of certain weather events occurring in this community as compared to the national average. The national average for each type of event equals a score of 100, so a score of 200 would represent twice the risk as the national average, and a score of 50 would represent half the risk of the national average.

## EDUCATION

The Community Educational Climate is a measure used to identify communities that are likely to have high quality schools by analyzing the social and economic conditions that are most likely lead to quality schools. Since this measure is based on the population of an entire community, it may not reflect the nature of an individual school.
